EVALUATION CRITERIA FOR ARTICLES

CONTENTS EVALUATION

1. Does the article reflect current state of the art?
2. Is the topic and/or its handling innovative?
3. Are the objectives clear?
4. Is the research method described adequately?
5. Is the choice of method and its application correct?
6. Are the interpretations and conclusions plausible?
7. Are references selected and used well?
8. Has the article or its part(s) been published earlier (to the best of Reviewer's knowledge)?
9. Is the subject compatible with the profile of the quarterly? If not, what other journal can be suggested to the author?

FORM EVALUATION

1. Is the title clear and adequate to contents?
2. Is the structure logical?
3. Is the language correct grammatically and stylistically?
4. Can the text be shortened? Which parts?
5. Are illustrations (drawings, graphs, tables) chosen and used well?
6. Are references and notes consistent with required principles?
7. Is the summary done correctly? Does it include concerning hypothesis, aim/objective, research method, findings, and conclusions?
